MODULAR MOON | MODULAR SYNTHESIS SCHOOL

ABOUT THE SCHOOL

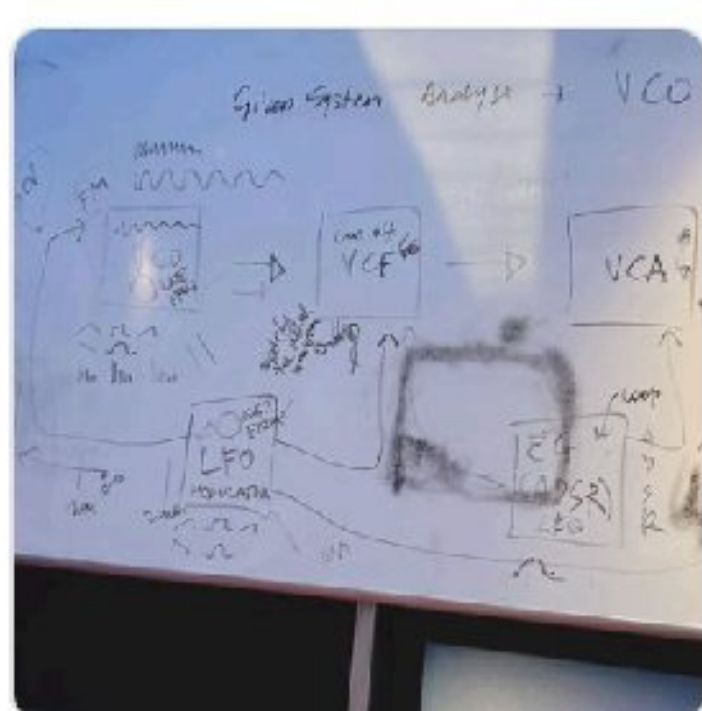

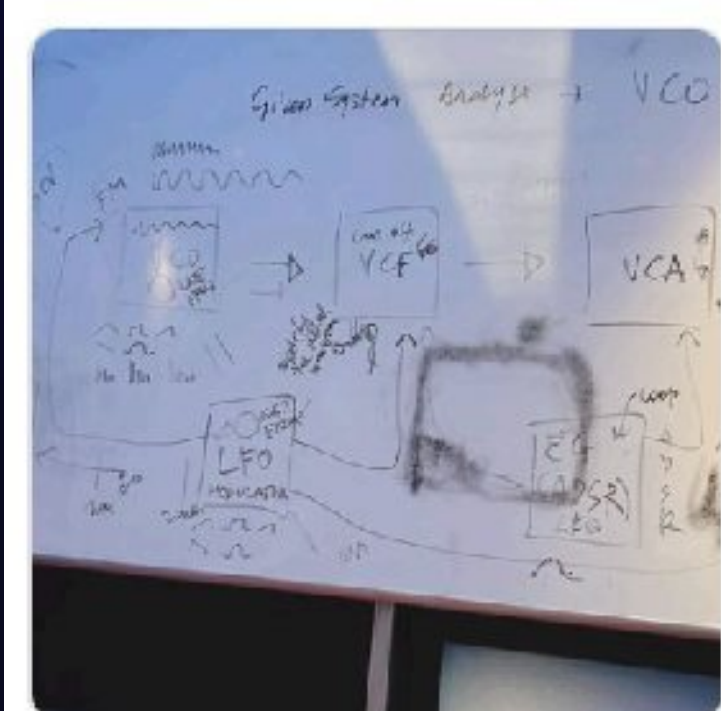

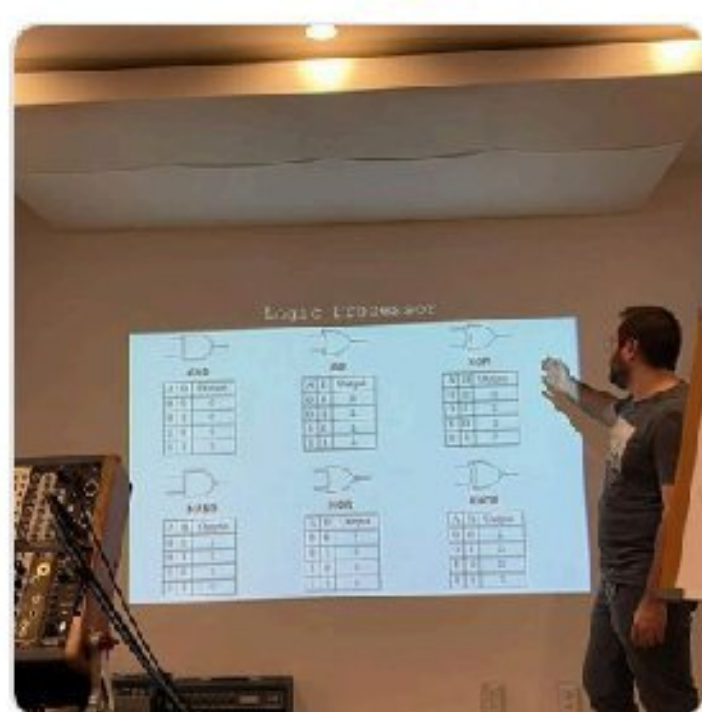

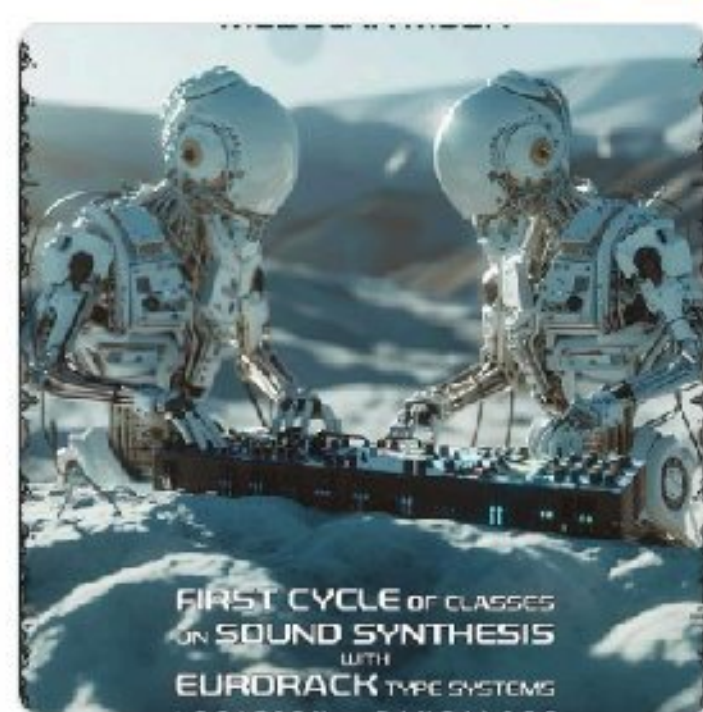

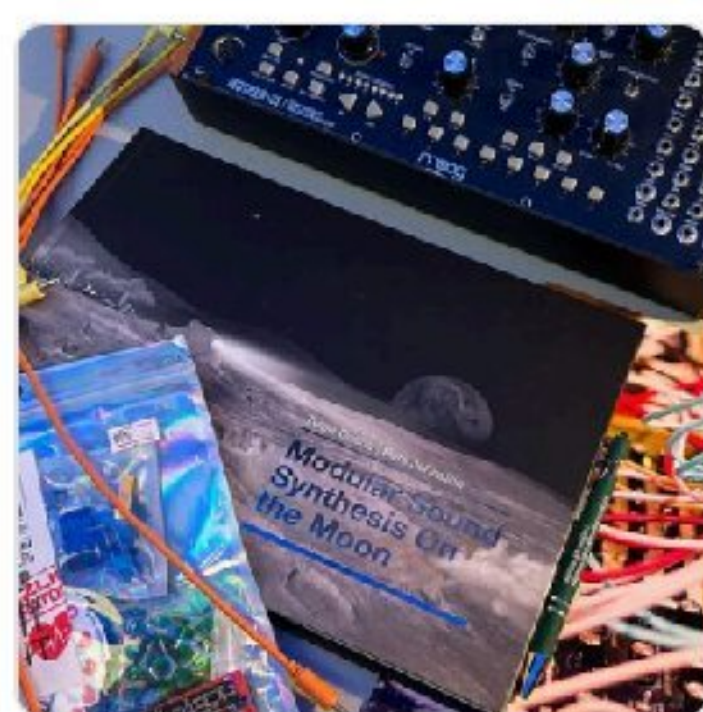

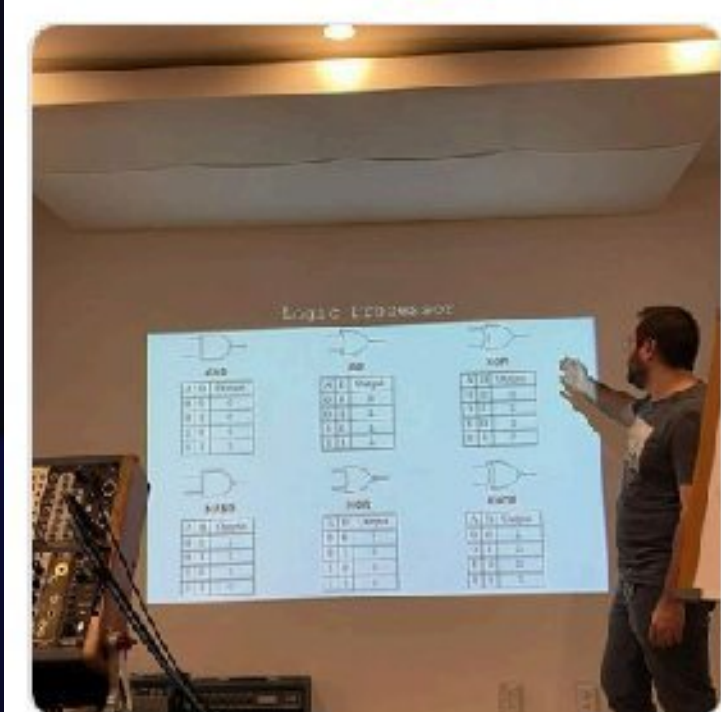

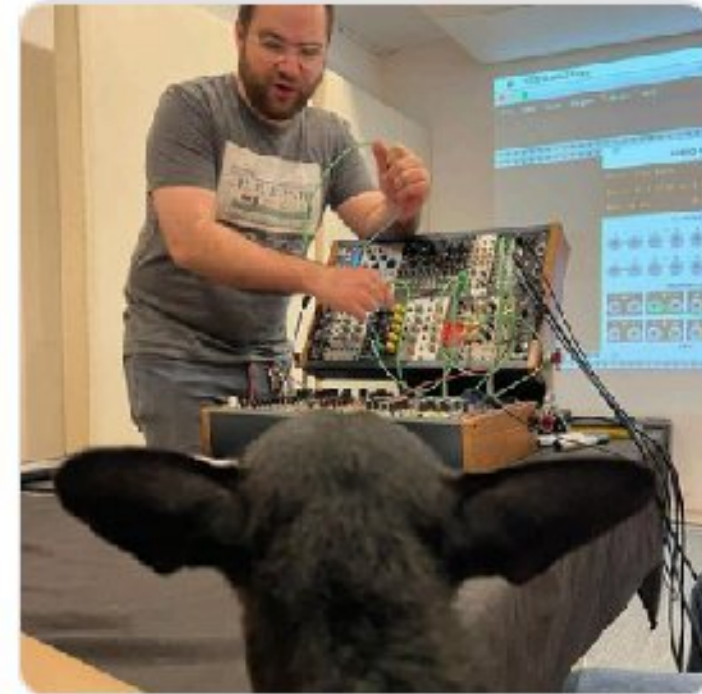

ACERCA DE LA ESCUELA

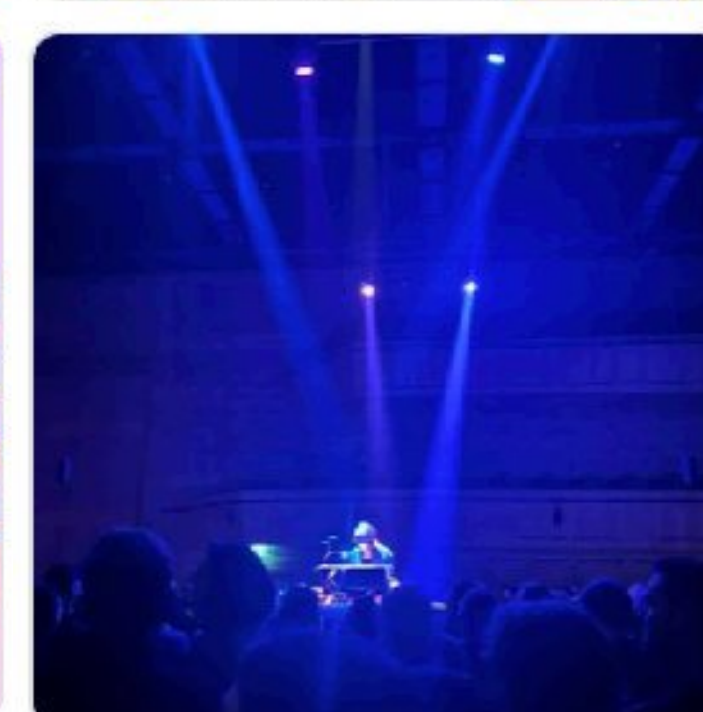

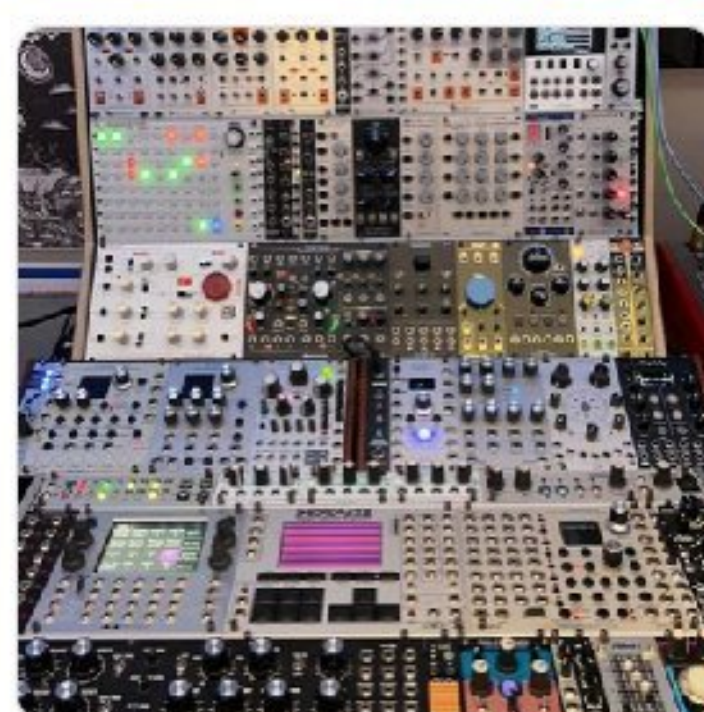

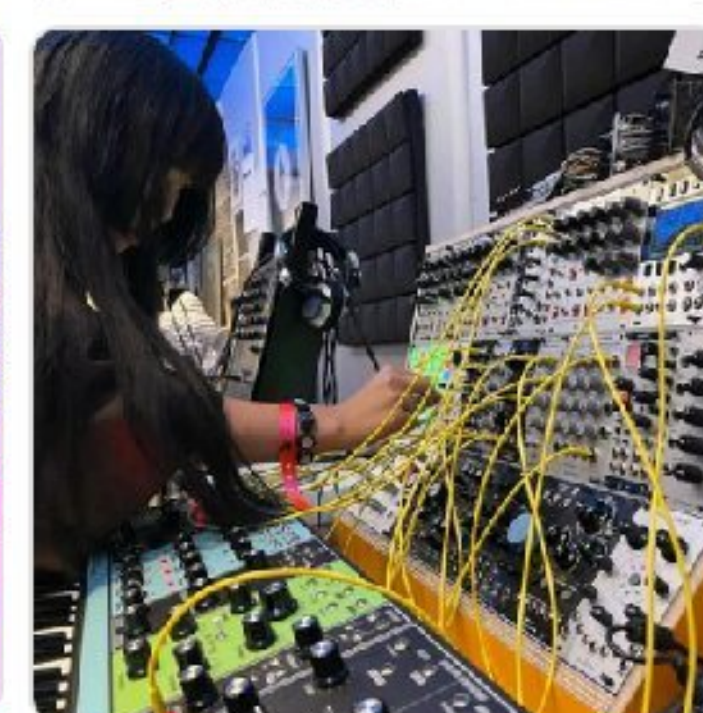

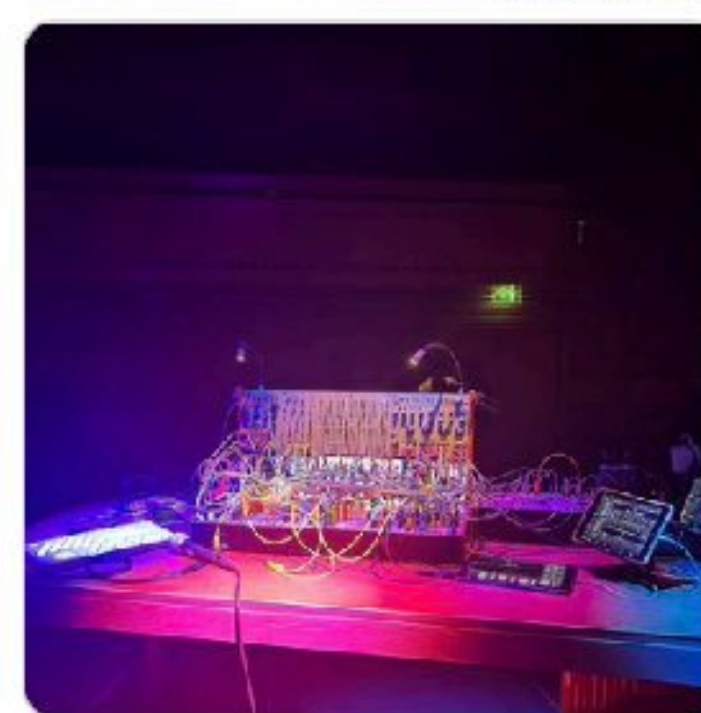

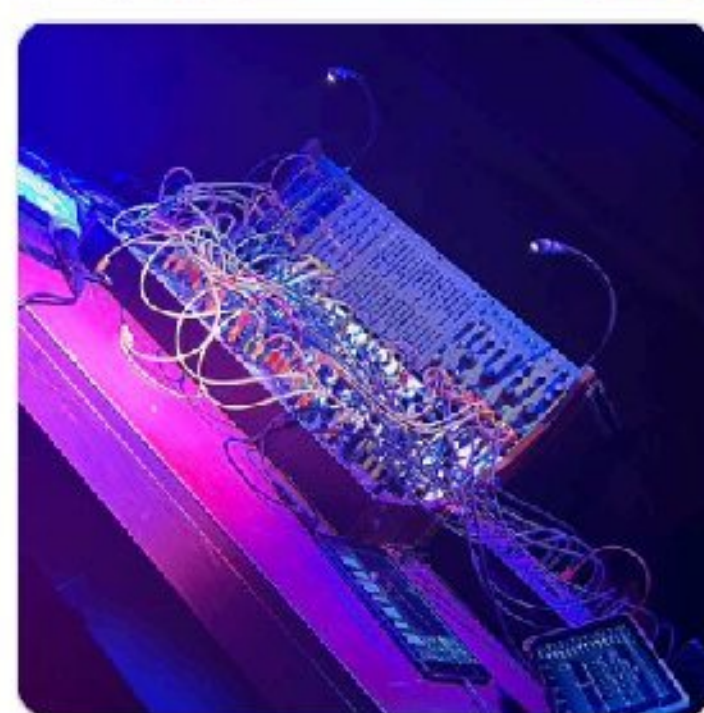

Modular Moon is the world's first school teaching work on Eurorack type systems, founded by Anna Martinova (Tulpa Dusha) in 2018 in Amsterdam, the Netherlands.

Over the 5 years of operation, the school has expanded to the status of an international educational institution - with the opening of sections in Mexico, Chile, Great Britain, India, satellites in Japan and Russia.

The school works according to the program prescribed in the book "Modular Sound Synthesis on the Moon" by Tulpa Dusha and Pete Johnston - an effective method of teaching sound synthesis, practiced in various institutions around the world - such as VCU Qatar, Musikverket Sweden, Victoria University of Wellington, New Zealand, Der Jyske Musikconservatorium Denmark, Conservatorium van Amsterdam, Netherlands, etc. The book has been translated into Spanish - being the first book in the history of Latin American music on this topic.

Modular Moon es la primera obra de enseñanza escolar del mundo sobre sistemas tipo Eurorack, fundada por Anna Martinova (Tulpa Dusha) en 2018 en Ámsterdam, Países Bajos. Durante los 5 años de funcionamiento, la escuela se ha ampliado hasta alcanzar el estatus de institución educativa internacional, con la apertura de secciones en México, Chile, Gran Bretaña, India y satélites en Japón y Rusia. La escuela trabaja según el programa prescrito en el libro "Síntesis modular de sonido en la Luna" de Tulpa Soul y Pete Johnston, un método eficaz para enseñar síntesis de sonido, practicado en varias instituciones de todo el mundo, como VCU Qatar, Musikverket Suecia, Universidad Victoria de Wellington, Nueva Zelanda, Der Jyske Musikconservatorium Dinamarca, Conservatorium van Amsterdam, Países Bajos, etc. El libro ha sido traducido al español, siendo el primer libro en la historia de la música latinoamericana sobre este tema.

Let's get Modular!

Please note: This session is designed as a hands-on workshop with limited capacity to enhance creativity and collaboration. On the day of the event, you'll find the session sign-up forms readily available at the registration desk near the entrance of [het Groene Paleis](#) (Nes, 42) on a first come first served basis.

You need a valid ADE Pro, Lab or Lab Day Pass to be able to attend the session!

Everything Modular with Modular Moon

Hosted by Tulpa | Dusha

This session is a three hour focus on modular sound synthesis. We will have the unique opportunity to dive into the eurorack world with the author of an educational method, presented world-wide as Modular Moon | Modular Synthesis School. In over 5 years, the Amsterdam-based school gained international fame, and became known for their effective curriculum method, published in book-form as Modular Sound Synthesis On the Moon.

Welcome to Modular Moon | Modular Synthesis School : a planet for self expression in the Sound Synthesis field.

Here one can discover, learn, prototype and create [modular synthesis systems](#). We give Modular Synthesis School classes, workshops, events and individual training. This is in the sonic realm and a place to create and listen. Available in several countries, Modular Moon | Modular Synthesis School is running courses on the electronic music creation and live performance process in the [Eurorack](#) domain.

THE PROGRAM | *EL PROGRAMA*

Modular Synthesis School Program Amsterdam

Includes:

- * **Modular Sound Synthesis On the Moon Guide book + The Platform access**
- * **Given System I individual system for the whole program time***
- * **Individual DIY kit**
- * **[360RA WalkMix](#) licence for the time of classes**
- * **Five Months of Classes**
- * **Workshops from top international artists**

Month I

Class 1: A beginning, Algorithm of Actions + Introduction

Class 2: Physics of Sound + Eurorack

Class 3: Given Systems Analyse + Signal Generators I VCO, LFO

Class 4: Signal Modifiers I VCF

Class 5: Signal Controllers: EG (ADSR)

Month II

Class 6: Signal Modifiers: VCA

Class 7: Signal Controllers I Clocks, CV, Trig, Sequencer, Arpeggiator, Tracker

Class 8: Linear, Logarithmic and Exponential control signals + Complex Patches Practice

Class 9: Patching the Bigger System

Month III

Class 10: Other modules and their function

Class 11: Synthesis Methods

Class 12: Practice of Synthesis Methods

Class 13: Multilayering

Month IV:

Class 14: Interfacing or Hybrid Systems

Class 15: Modular in a context of Studio Work

Class 16: Music Recording and Post Processing

Class 17: Preparation to Live Performance in different genres

Class 18: Live Performance Mode

Month V:

Class 19: [Kyma Pacarana introduction](#)

Class 20: [360RA WalkMix Sound Design](#)

Class 21: Basic Electronics, DIY I

Class 22: DIY II

Class 23: Your Own System Prototype + Safety and Graduation

BONUS: Party

CARACTERISTICAS DE NUESTRO PROGRAMA DE ESTUDIO

- No es necesario tener conocimientos previos en síntesis modular o electrónica.
- Cada alumno contará con un sistema ya sea modular o semi-modular para la práctica en clases.
- Cada módulo estudiado y parche creado en clases, se evaluará tanto en Eurorack, semi-modulares y en el software VCV RACK .
- Cada alumno obtendrá el libro oficial de Modular Moon “Modular Sound Synthesis on the Moon” en español.
- Las clases serán los días Sábados de 10:00 a 13:00 hrs; sin embargo el alumno podrá ir a las instalaciones a utilizar el laboratorio para prácticas y tareas durante la semana, previa coordinación con los profesores.
- El alumno podrá acceder a una plataforma privada donde existirá cada módulo de aprendizaje pre-grabado, con la explicación de los tópicos vistos en clase y los parches utilizados.
- Cada alumno que apruebe el programa de estudios recibirá un diploma formal validado por la casa matriz Modular Moon en Amsterdam.
- Máxima cantidad de alumnos: 8
- Duración de 16 clases en total (4,5 meses)

Módulo 1: Un comienzo, Algoritmo de Acciones + Física del Sonido.	Módulo 4: Modificadores de señal VCF, VCA.	Módulo 6: Relojes, CV, Trigger, Secuenciador, Arpegiador, MIDI	Módulo 8: Parches complejos entre sistemas modulares y semi- modulares	Módulo 10.1: Sonido y su aplicación en la música taller de composición	Módulo 14: Diseño sonoro.
Módulo 1.2: De la física del sonido a los parámetros de la música.	Módulo 4.1: Parámetros del sonido: timbre y duración.	Módulo 6.1: Parámetros del sonido y aplicación en la música: intensidad y altura.	Módulo 8.1: sonido y aplicación en la música: lenguaje musical y armonía básica.	Módulo 11: Práctica de métodos de síntesis.	Modulo 15: Coaching de presentación en vivo, preparación y ensayo
Módulo 2: Armado de sistema Eurorack + Análisis de los sistemas	Módulo 5: Controladores de señales EG (ADSR).	Módulo 7: Señal lineal, logarítmica, exponencial, práctica parches complejos	Módulo 9: Otros módulos y sus funciones.	Módulo 12: Multicapas.	Módulo 16: Presentación de Live Set + examen teórico.
Módulo 3: Generadores de señales VCO.	Módulo 5.1: Parámetros del sonido y lenguaje musical; práctica en DRUM-MACHINE.	Módulo 7.1: Sonido y lenguaje musical; altura, escalas, acordes y melodías.	Módulo 10: Métodos de Síntesis.	Módulo 13: Sistemas de interfaz + grabación y post procesamiento de música.	Módulo 17: Fiesta de graduación

THE BOOK | *EL LIBRO*

THE BOOK

EL LIBRO

Modular Sound Synthesis On The Moon, the book by Tulpa Dusha and Pete Johnston, is a collection of theoretical and practical materials for students of the Modular Synthesis School. The guide was created for students as an additional information source and is based on the modular synthesis system presented in the class, and explains the major basic principles of sound synthesis. The book is translated to Spanish language.

Modular Sound Synthesis On The Moon, el libro de Tulpa Dusha y Pete Johnston, es una colección de materiales teóricos y prácticos para estudiantes de la Modular Synthesis School. La guía fue creada para los estudiantes como una fuente de información adicional y se basa en el sistema de síntesis modular presentado en la clase y explica los principales principios básicos de la síntesis de sonido. El libro está traducido al idioma español.
